Hardware and Operations System Configurations For Legal Seminar Attendees

Internet Connection
Before accessing the event, ensure that your browser is configured to stream media. All webcasts require a broadband connection. For video streaming, an Internet connection of 800 Kbps or higher is recommended.

If you experience connectivity issues and are connecting via a VPN, please close your VPN software and connect directly to the Internet. Some VPNs, proxy servers, and other security tools can interfere with your ability to connect to INXPO.

Cookies & JavaScript
To access the 2020 Legal Seminar, your computer must have cookies and JavaScript enabled. Use the link below to test your system prior to the meeting:
